

We offer you an extensive total package.

Our corporate philosophy consists of accomplishing tasks and offering solutions in the areas of repair, cleaning, container management and logistics, which are required for an efficient and hitch-free production.

But there's more to it than that: We as one of the few enterprises in Germany offer an extensive total package to our clients. This ensures different services such as repair, cleaning, storage and container management to be maintained at one respective location in order to manage your charge carrier professionally.

This doesn't only call forth enormous cost savings, but also a more comfortable handling for our customers, because you don't have to bring your charge carrier to different companies – our company is a one-stop enterprise where you get everything from one hand.
